Recommended Use of Secondary Water

The City will start to pressurize the secondary water system about April 15th. Everyone is being asked to wait until **May 1st** to start watering. The following is the recommended watering procedure:

- Please check your valve to make sure that it has been turned off from the winter months.
- Open your valve slowly to check for leaks and broken pipes.
- If you have a broken pipe it is most likely to have been frozen throughout the winter months.
- It helps watering during the day as well as at night in order for the system to operate more efficiently.
- It is recognized that watering during the day is less efficient, but it is necessary to better balance water use with supply.

Due to the ongoing drought we will continue this year with a watering schedule. If your house number is odd your watering days are Mon., Wed., and Fri. If your house number is even your watering days are Tues., Thurs., and Sat. We will be monitoring water usage for noncompliance to watering days and wasting water again this year. Compliance officers will be working around the clock. So please adhere to your days and conserve where you can.

If you have any questions, please contact the Water Department at 801-785-2941.
